

Here to support you to thrive

Sylvanvale's Clinical Services team provides Positive Behaviour Support to people living with disability. We partner with you, your family, and support team to build skills, strengthen communication, and improve quality of life.

What we do

We work with you, your support network, and therapists to build positive, practical strategies to express your needs, based on:

- What you want to achieve
- What your behaviours may be communicating

These strategies, built into a Behaviour Support Plan, focus on building independence, confidence, and long term wellbeing.

We take the time to understand your goals, strengths, communication style, and daily environment so that the support we provide is meaningful, practical, and sustainable.

How we work with you

- We come to you across Greater Sydney and the Blue Mountains. Our practitioners spend time onsite with site managers and support teams, as well as out in the community with you, to observe, collaborate, and create strategies that work in real life.
- Support can also be delivered via video conferencing, phone, or at our Sutherland head office.
